Certificate of Approval: APC 68/37  
Delaware Sand and Gravel Company, Inc.  
Sanitary Landfill - New Castle

Mr. Joseph DellAversano  
Delaware Sand and Gravel Company, Inc.  
R. D. Box 229  
Grantham Lane  
New Castle, Delaware 19720

Dear Mr. DellAversano:

Pursuant to the provisions of Section 6203, Chapter 442, Volume 55, Laws of Delaware, and by approval of the Delaware Water and Air Resources Commission on September 9, 1968, permission is hereby granted for the operation of a sanitary landfill on Grantham Lane, New Castle, Delaware in accordance with the report submitted in support of the application for permit. These supporting items are listed in Appendix A of this permit and are made a part thereof.

This Certificate of Approval is issued subject to the following conditions:

1. This operation shall be conducted in accordance with the report described above.
2. Representatives of the Water and Air Resources Commission may, at any reasonable time, inspect this operation.
3. The operation of the landfill shall, at all times, be in such a manner as not to cause air pollution from open burning or cause offensive odors which interfere with the enjoyment of life or property and are detectable in areas of human habitation or public use.

4. The face and top of the individual lifts shall be compacted and covered twice a week with a compacted layer of at least six (6) inches of suitable cover material.

5. Access roads shall be constructed and maintained in such a manner as to eliminate local nuisance conditions stemming from dust. Access shall be limited to those authorized to use the site for disposal of refuse.

6. There shall be no open burning associated with this operation.

7. This Certificate will be revoked upon violation of any of the preceding conditions and the operator shall be subject to the punitive measures of Section 6013 of the Water and Air Resources Act.

Sincerely yours,

  
John C. Bryson  
Executive Director

Inorganic Waste About 20 to 25 loads a day (app. 400 yds) 7 days a week  
Landfill Operation:- Waste material is dozed over every day, usually in the afternoon after major part is dumped. Cover material is spread so trucks can back up over waste. Once a week material is hauled and spread over top surface packed and graded. A gravel top is usually material utilized so that trucks do not get stuck. Every three months a fire break is built over the entire face of the fill to stop any underground fires in case of such. In any case of fire there is always on hand an adequate amount of dirt or sand fill to cover the operation by use of one or two machines without need for trucks to haul it. This cover operation can then be hauled by our personnel without having to call in other workmen.

Material Handled:- Cork dust  
Wood  
Scrap metal  
Glass

Fiber scraps  
Plastic  
Tires  
Rubber products

Paper  
Styrofoam  
Car seats
